

# Your Pharmacy Checklist

NP Thyroid® is affordable and widely available.

## Before you go to the pharmacy

### Confirm with your insurance provider:

- ✓ Is NP Thyroid® covered by my insurance?
- ✓ Have I met my deductible so that I qualify for coverage?

### Consider your options to get NP Thyroid®:

- ✓ Order direct through Glendale Pharmacy to get NP Thyroid® consistently and conveniently, at a low price.
- ✓ Check pricing on GoodRx®, SingleCare®, and Visory Health®.

Find these resources at [npthyroid.com/savings](https://npthyroid.com/savings)

## At the pharmacy

- ✓ If the pharmacist tells you that NP Thyroid® is not in stock, ask to have it ordered. They should be able to get it within 24 hours.
- ✓ Confirm with your pharmacist that your prescription is NP Thyroid® and not a substitute.

NP Thyroid® tablets are tan in color and are debossed with the letters AP.

Image does not represent the actual size of the tablet. The number debossed on the tablet will vary by strength.

**Questions about NP Thyroid? Visit [npthyroid.com](https://npthyroid.com) or call 1.800.541.4802**

Note that DTE products, including NP Thyroid®, have not been reviewed by the FDA for safety or efficacy.

#### IMPORTANT RISK INFORMATION

Drugs with thyroid hormone activity, alone or together with other therapeutic agents, have been used for the treatment of obesity. In euthyroid patients, doses within the range of daily hormonal requirements are ineffective for weight reduction. Larger doses may produce serious or even life-threatening manifestations of toxicity, particularly when given in association with sympathomimetic amines such as those used for their anorectic effects.

Please see Important Risk Information on next page. For full Prescribing Information, including BOXED WARNING, visit [npthyroid.com/pi](https://npthyroid.com/pi)

## USE AND IMPORTANT RISK INFORMATION, INCLUDING BOXED WARNING

### What is NP Thyroid® (thyroid tablets, USP) used for?

NP Thyroid® is a prescription medicine that is used to treat a condition called hypothyroidism from any cause, except for cases of temporary hypothyroidism, which is usually associated with an inflammation of the thyroid (thyroiditis). It is meant to replace or supplement a hormone that is usually made by your thyroid gland.

NP Thyroid® is also used in the treatment and prevention of normal functioning thyroid goiters, such as thyroid nodules, Hashimoto's thyroiditis, multinodular goiter, and in the management of thyroid cancer.

### IMPORTANT RISK INFORMATION

**Drugs with thyroid hormone activity, alone or together with other therapeutic agents, have been used for the treatment of obesity. In euthyroid patients, doses within the range of daily hormonal requirements are ineffective for weight reduction. Larger doses may produce serious or even life-threatening manifestations of toxicity, particularly when given in association with sympathomimetic amines such as those used for their anorectic effects.**

### When should I not take NP Thyroid®?

NP Thyroid® should not be used for weight loss. Do not use NP Thyroid® if you have hyperthyroidism, overactive thyroid, uncorrected adrenal problems, or are allergic to any of its ingredients.

### What warnings should I know about NP Thyroid®?

Large doses of NP Thyroid® may cause serious or life-threatening side effects, including chest pain, increased pulse rate, rapid, strong, irregular heartbeat, and excessive sweating.

NP Thyroid® should be used with caution in people with heart disease, on diabetes medication, or on blood-thinning medication.

Partial loss of hair may be experienced by children in the first few months of thyroid therapy, but this will usually go away on its own.

### What should I tell my healthcare provider?

Tell your doctor immediately if you experience chest pain, increased pulse rate, rapid, strong, irregular heartbeat, excessive sweating, or any other unusual event.

Tell your doctor about any other medical conditions you may have, especially heart disease, diabetes, blood clotting problems, and adrenal or pituitary gland problems. The dose of other drugs you may be taking to control these conditions may have to be changed while you are taking NP Thyroid®.

If you have diabetes, check your blood sugar levels and/or the glucose in your urine, as ordered by your doctor and immediately tell your doctor if there are any changes.

Tell your doctor if you are allergic to any foods or drugs, are pregnant or plan to become pregnant, are breastfeeding or are taking any other drugs, as well as prescription and over-the-counter products.

### What are the side effects of NP Thyroid®?

Side effects may include chest pain, increased pulse rate, rapid, strong, irregular heartbeat, or excessive sweating. If you experience these side effects, immediately contact your doctor.

### What other medications might interact with NP Thyroid®?

NP Thyroid® can interact with some medications, such as oral anticoagulants, which are medicines used to thin the blood, insulin or oral medications used to treat diabetes, certain medications used to treat high cholesterol levels, and estrogen containing birth control pills.
